OPERATING INSTRUCTIONS

TRANSFER OR SIPHON LIQUID

1. Press in and hold the upper intake connector and insert the transfer hose. Release intake connector to lock the hose. Please make sure hose is securely connected before use.
2. Repeat step 1 and connect the other transfer hose to the discharge connector.
3. Place one end of the transfer hose connected to the intake to where the liquid needs to be transferred from.
4. Place the other end of the transfer hose connected to the discharge to where liquid needs to go.

Note: For a better result, the discharge hose must be lower than the intake hose.

5. Pump 3–4 times. It should not need continuous pumping once liquid begins to flow. Continuous pumping will accelerate the process.
6. For release, press in and hold the connector. Release and then remove the hoses.

USE AS AN AIR PUMP

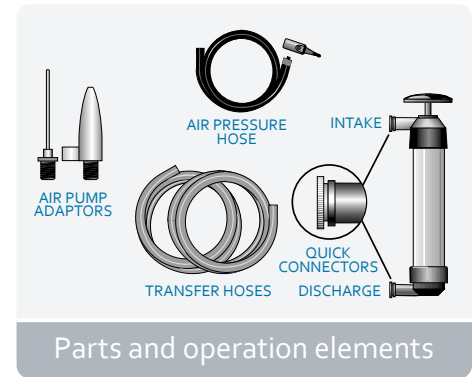

1. Insert the locking nozzle head to the air pressure hose end with metal ring.
2. Press in and hold the lower discharge connector and insert the air pressure hose. Release discharge connector to lock the hose.
3. Insert your desired air pump adaptor to the locking nozzle head. Fold down the lever to lock the air pump adaptor.
4. Please make sure air pressure hose and air pump adaptor are securely connected before use.

CLEANING INSTRUCTIONS

- Flush the pump thoroughly with water; especially after pumping or siphoning gas or any flammable liquid.
- Never use harsh chemicals, cleaning solvents or strong detergents for cleaning.

WARNING:

- Please use protective gloves when siphoning any flammable or harsh liquids or oils. If contact is made, rinse affected areas immediately with plenty of clean water and contact a doctor urgently.
- Thoroughly clean the pump after pumping or siphoning gas or any flammable liquid to avoid contamination. Serious injury or property damage could result if not cleaned properly.
- Avoid sparks, open flames or splashes onto hot surfaces when pumping gas or other flammable liquids. Serious injury or property damage could result.
- This item is for domestic use only and is not suitable for non-potable water supply.

Parts and operation elements

ALDI guarantees that our exclusive brand products are developed to our stringent quality specifications. If you are not entirely satisfied with this product, please return it to your nearest ALDI store within 60 days from the date of purchase for a full refund or replacement.
